Present day

Self-directed Learning & Development

Portugal / France

Self-employed

Fully committed to grow professionally. Took the opportunity to further develop my skills in software development through self-directed learning, during a career break due to caregiving. Acquired skills in crypto trading, writing software in *typescript* ecosystem, IaC tools and server automation (terraform, ansible), explored cloud solutions (AWS, Azure)

2020 set

2022 aug

Caregiving

Russia

Took a voluntary career break to provide caregiving for a family member, during a challenging period, marked by covid and health issues, in which appropriate facilities were unable to aid in the matters.
